DISCRIPTIVE CATALOGUE OF

ROSES, PLANTS, FRUIT TREES, SMALL FRUITS,

SHRUBS, FLOWER SEEDS GARDEN

SEEDS, BULBS, ETC.

————— 1909. —————

Cobb & Bobbitt,

PERRY, - - OKLAHOMA.

OFFICE and GREENHOUSES ON SIXTH STREET, THREE BLOCKS NORTH OF THE
PUBLIC SQUARE.

ALL STOCK IS SHIPPED BY FREIGHT OR EXPRESS AT PURCHASER'S EXPENSE EXCEPT AS PROVIDED BELOW.

(See Paragraph "Postage Prepaid.")

We take pleasure in presenting this, our first annual catalogue. We have not attempted to list and describe a great number of varieties for the sake of making a large showy catalogue. We have listed only such varieties as are standard and we aim to keep them in stock in their seasons. We have aimed to make all our descriptions as concise and accurate as possible. Some varieties have not been tested here to any extent, and but few long enough to establish their value considering the climatic and soil changes which take place as the state grows older. If properly cared for almost all fruits do well here and produce good crops. Roses and most varieties of shrubs and bedding plants succeed. In fact Oklahoma cannot be excelled as a land of fruit and flowers.

PLEASE READ CAREFULLY.

ORDER EARLY. We try to fill all orders promptly but during the planting season every one wants their seeds and plants at once and some delay at times is inevitable, though we shall endeavor to have help enough to keep up. If you will send in your order early we shall appreciate it.

OUR TERMS. Please send cash with order. When to be sent by express, C. O. D., one-fourth of the amount of order must be enclosed. If to be sent by mail cash in advance is required, and, where our prices do not include postage, enough should be sent extra to cover same. Please be careful to observe this and save trouble and delay.

POSTAGE PREPAID on flower and garden seeds in packets when ordered in any amount, and on roses from 2 1-2 pots, bulbs, house and bedding plants, evergreens in the smallest size, and hardy herbaceous perennials when the order for either of these or all together amount to one dollar. If your order is for less than one dollar send ten cents extra for postage and packing.

MISTAKES are sometimes made by everyone and while we try to be as careful as possible we will make them once in awhile, but we are always anxious to correct them as far as is in our power. Write us at once if a mistake occurs but do not return goods or tell your neighbors until you hear from us.

While we use every precaution to have stock true to name, and hold ourselves in readiness to replace any proving otherwise, we give no further warranty, expressed or implied, and will not be held responsible for crop beyond the amount paid for the stock.

Books and Papers.

We can supply a full line of Horticultural and Agricultural Books and Periodicals, but we have no room to quote. If you wish anything in this line write us and we will be glad to give you prices on anything you want.

ROSES.

The soil of Oklahoma is especially well suited for rose growing, and our plants will be found strong and healthy. We have a full line of all the leading classes, Teas, Hybrid Teas, Bourbons, Climbing Teas, Hybrid Perpetuals, Hardy Climbers, Etc. In all our descriptions we have tried to be concise and accurate.

EVERBLOOMING ROSES.

This includes the Teas, Hybrid Teas, Bourbons, etc. These plants are summer grown and rested in dormant state until February when they are started into active growth ready for early planting.

PRICES.

1 yr., 2 1-2 inch pots,	10cts., \$1.00 per dozen.
2 yr., 4 inch pots,	35cts., \$3.25 per dozen.

Bessie Brown. Of a distinct type in shape and coloring. Erect stems; full deep blooms with enormous petals; white, suffused with pink, growing deeper toward center.

Bridesmaid. Clear, shining pink; buds of exquisite shape; stems long and stiff; a profuse bloomer. One of the very best pink roses.

Burbank. Bright rosy red, a very profuse bloomer and a fine double, cup-shaped flower.

Catherine Mermet. Clear shining pink with rich amber center; elegant buds and large globular flowers; handsome bush with dark green leaves.

Cherry Ripe. Light rosy-crimson, similar in color to Alfred Colomb; well formed and globular; very free, vigorous and hardy.

Christine de Neve. Deep glowing red; long finely pointed buds; semi-double; a constant and free grower and bloomer.

Clothilde Soupert. A splendid rose for bedding out or for pot culture; medium size and very double; white, shading to deep pink at the center; a profuse bloomer and a strong dwarf grower.

Cornelia Cook. Clear snow-white; immense buds and symmetrical flowers on massive stems.

Etoile de France. Brilliant shade of clear crimson velvet, centering to vivid cerise; large flowers on long stiff stems; remarkably vigorous, free blooming and hardy. A valuable variety of striking beauty as an outdoor bloomer with bronzy-green foliage.

Etoile de Lyon. Deep, golden yellow; a healthy, vigorous grower, blooming freely early and late; full deep and rich flowers, very sweet; extremely hardy, both as to heat and cold.

Gen. McArthur. Vivid crimson-scarlet,

a most beautiful shade, retaining its brilliancy when fully expanded. Large flower, of superb form.

Golden Gate. A strong grower for bed or house; produces freely, long, pointed buds, opening to large double flowers; creamy white, tinted with soft yellow at base of broad petals bordered with clear rose.

Grus an Teplitz. (Crimson Hermosa.) Hardy in all sections; grows freely; vivid fiery crimson; sweetly fragrant. Always a mass of bloom.

Helen Good. A true sport from Maman Cochet, with the same habit and foliage, while the color is quite new and distinct, a delicate pink, each petal shaded deeper.

Helen Gould. An incessant grower and bloomer, hardy everywhere. Long beautiful buds and full, double flowers of warm, rosy crimson, resembling a red ripe watermelon.

Ivory. (White Golden Gate.) Pure, ivory white; Exact counterpart of Golden Gate in growth and form of flowers.

Kaiserin. Pure white, does not tint with pink when outdoor grown; splendid, large buds and superb double blooms, making the choicest cut flowers.

Killarney. (The Irish Beauty.) Brilliant sparkling pink with large pointed buds, broad wax-like petals and enormous semi-full flowers of exceeding beauty.

La Detroit. Clear flesh-pink, shading to deep rose; fine broad shell-like petals; very full and deliciously tea scented. A vigorous grower and abundant bloomer.

Lady Battersea. Lovely wine-red; very long pointed buds and large, full, double blooms.

La France. Silvery-rose, with pink shades and satin like petals. Large, symmetrical, and fragrant. A universal favorite.

Madam Chatenay. A good grower and a perpetual bloomer; large and beautiful in bud and bloom. Deep recurved petals of rose-pink, with a tinge of salmon.

Madam Caroline Testout. Brilliant satiny rose, deepening at center and bordered with silvery rose. Immense broad petals and extremely large flowers.

Mad. Franciska Kruger. A vigorous grower and constant bloomer for outdoor cul-

ture. Very double, deep coppery yellow, tinged with pink.

Mad. Cecil Berthod. Deep golden yellow, the deepest yellow rose grown. Large, beautiful buds and flowers.

Magna-frano. Deep shining rose, the result of Magna Charta crossed with Safrano, combining the hardness of the former with the free-blooming habit and tea fragrance of the latter.

Maman Cochet. Rich rosy pink, shaded silvery rose on outer petals; Exquisite in color and graceful in form from bud to bloom and delightfully fragrant; beautiful, healthy foliage and long stiff items. Unquestionably the queen of pink Tea Roses.

Marie Van Houtte. Rich, creamy-white, faintly tinted with rose; extra large, very double, full, and deliciously scented.

Meteor. Intense velvety crimson; buds and blooms large, fully double, and borne on long stems. Very popular.

Mignonette. Polyanthus, or Fairy Rose. Clear pink, tinted with rose; Small flowers, perfectly double and fragrant.

Parquetette. Pure white Polyanthus. Blooms in cluster of very double fragrant flowers.

Perle des Jardins. Clear golden yellow of a rich and beautiful shade; flowers are large and globular in form and of great depth; richly perfumed. A distinct variety in shape and color. Without doubt the finest yellow rose grown, and would be very popular if it was more hardy.

Queen's Scarlet. A profuse and constant bloomer; brilliant and striking flowers of clear velvety-scarlet.

Rainbow. Deep coral pink; striped with intense crimson. Beautiful buds and large semi-double flowers.

Richmond. Scarlet-crimson of a most brilliant hue; long pointed buds and beautiful flowers on tall, erect stems. Handsome dark foliage; a rapid grower and a constant bloomer.

Safrano. Bright apricot yellow, changing to orange-fawn, reverse of petals tinted with flesh pink. Splendid buds and fragrant star-shaped, single or semi-double flowers.

Snowflake. Pure white, does not pink. A fine grower and bloomer. Sometimes called the White Hermosa.

Souv. de La Malmaison. Lovely flesh-pink elegantly shaded with rosy peach. perfectly full double, and very large. Has fine form and fragrance. Free and vigorous for garden culture.

Souv. de Pierre Notting. A seedling of Marechal Neil and Maman Cochet. Color shadings difficult to describe, combining creamy white, faint orange yellow and

light peach, with edges of petals bordered in carmine rose, all blending in perfect harmony. Elongated buds and large, full flowers.

Sunrise. Brilliant coloring as seen in the Austrian Copper, scarlet and yellow. With the unfolding, the colors deepen, the scarlet turning to dark red, the yellow to orange and copper, inside of petals to golden yellow. Large, double and finely perfumed.

Sunset. Rich, golden amber, shaded with ruddy copper in harmony with its name. Finely formed buds and large flowers, blooming freely.

The Bride. Pure white under glass, taking on a delicate pink tinge out of doors. An old favorite.

The Queen. Pure, snow-white; beautifully formed buds and large petals. A free and continuous bloomer.

Uncle John. A sport from Golden Gate with deeper tones of color, both in the cream and the pink.

Wellesley. Bright, clear, salmon rose, reverse of petals silver-rose; retains the form of Liberty and the fullness of Bridesmaid, its parents. Tall, stiff canes; vigorous, healthy and free,

White Maman Cochet. Very large and beautifully formed in bud and bloom; pure white under glass, but slightly flushed with pink outdoors. Vigorous and productive.

Yellow Cochet. A hardy, strong grower, producing heavy foliage and strong, stiff stems; buds graceful in shape, and fine open flowers of sulphur yellow, blooming from early spring until frost.

HYBRID PERPETUAL ROSES.

The Hybrid Perpetuals are a class of strong upright growers. They form tall, compact bushes and in the spring are a perfect mass of bloom. They should be cut back severely before growth begins every year, removing most of the old wood and cutting back the new growths two-thirds of their length. When thus treated the blooms will be magnificent, with long stems and beautiful foliage. Most of them in favorable seasons will give some bloom during the summer and fall and a few bloom almost as freely as the teas. The flowers have great substance, rich colors, fine form, and are exceedingly fragrant.

PRICES.

1 yr., 2 1-2 inch pots,	15cts., \$1.50 per dozen.
2 yr., field grown,	35cts., \$3.25 per dozen.

Alfred Colombe. Cherry-crimson; large, globular flowers; an erect grower and an

abundant bloomer.

Anna de Deisbach. A lovely clear pink; long, pointed buds and large petals. Very large, finely formed flowers, full and double; sweetly fragrant. A vigorous grower and one of the freest bloomers of the class.

Baron de Bonstetten. Large, full and quite double blooms; rich dark red passing to deep velvety maroon; very fragrant and beautiful.

Black Prince. Intensely dark crimson, approaching black; cup-shaped, large and full.

Capt. Christy. Delicate flesh pink, shading deeper at center. Magnificent double flowers of bright satiny appearance.

Clio. A vigorous grower producing handsome foliage; large, glo'ular flowers of flesh color shaded to the center with rosy pink.

Dinsmore. A general favorite. Hardy, vigorous and a very free and profuse bloomer; large, handsome and perfectly double. Rich cherry red.

Frau Karl Druschki. (White American Beauty.) An everywhere hardy vigorous grower, with bright green leaves, delicately veined, Splendid long buds and magnificent snow-white blooms with large saucer shaped petals. Very free bloomer and the best white of the class.

Gen. Jacquiminot. A celebrated and much sought for variety. Shapely buds and handsome blooms of bright, shining crimson, rich, brilliant, velvety and fragrant.

Gloire Lyonnaise. A pale shade of cham-ouis or salmon-yellow, sometimes passing to creamy-white, finely tinted orange or fawn. The nearest yellow Hybrid Perpetual Rose, and a grand one

J. B. Clarke. Intense scarlet, shaded crimson-maroon, very dark and rich, and fragrant; petals large, deep and smooth; extremely high pointed center; foliage bronzy-green changing to dark green; growth strong and upright, making a large handsome bush.

John Hopper. Bright rose; large, solid and regular flowers, perfectly full and double; free and fragrant; with very few thorns.

Jubilee. A new hardy hardy hybrid. buds long and graceful; flowers extremely large, full and double; color glowing, velvety crimson, with maroon shading at the base; fragrant.

Mad. Chas. Wood. Bright firey red; a large rose, very double, full and quite fragrant. Handsome, showy and a constant bloomer.

Mad. Plantier. A Spring blooming rose, Well worthy of its long and continued

popularity. Pure white, double and hardy as a forest tree. Used extensively as a cemetery rose.

Magna Charta. Extra large, full flowers: sweet and of fine form; deep pink in color, and one of the hardiest.

Margaret Dickson. Pure waxy-white flowers of magnificent form and size, with large shell-shaped petals and pale flesh center; long stiff stems.

Mrs. John Laing. A beautiful clear pink; each fine bud with the surrounding leaves forms a dainty and lovely boutonniere. Immense full blooms; sweetly scented.

Paul Neyron. Largest of all roses; beautiful clear pink; very double and full. very free.

Prince Camille de Rohan. Universally known as the "black rose," because of its deep velvety-crimson color, shaded with intense maroon and black. Immense finely formed and sweetly scented blooms.

Roger Lambelin. An extremely odd variety with dark crimson blooms, each petal with uneven edges bordered with white, much like a double petunia.

Ulrich Brunner. Brilliant cherry red flowers of immense size and bold round form.

Vick's Caprice. A variegated hardy rose; attractive flowers of satiny pink, striped and shaded with white and carmine; full and deep; one of the freest bloomers of the class.

HARDY CLIMBERS.

Most of these are rapid vigorous growers and bloom freely in the spring but only a few of them are everbloomers.

PRICES.

1 yr., 2 1-2 inch pots,	15cts.,	\$1.50 per dozen.
2 yr., field grown,	35cts.,	\$3.25 per dozen.

Crimson Rambler. The most popular out-of-door climber of today. A rapid producer of long heavy canes, reaching a height of ten to twenty feet in one season. Rich clusters of bloom form a mass of vivid crimson. Perfectly hardy everywhere and under the most trying conditions.

Dorothy Perkins. Beautiful shell-pink color, which holds for a long time, fading finally to a lovely deep rose. Very sweet scented; fully equal to Crimson Rambler in foliage, hardiness, habit of growth and blooming.

Keystone. Deep lemon yellow; double as a Clothilde Soupert; fragrant as a magnolia blossom; a rapid climber and free brancher. Insect proof and hardy to the last degree. A continuous bloomer.

Baltimore Belle. Pale blush, passing to pure white, very double flowers in beautiful clusters, making a perfect mass of bloom; one of the best hardy climbers and a fine companion plant to **Crimson Rambler**.

Climbing Paul Neyron. Clear, satiny rose; large beautiful flowers; few thorns.

Mary Washington. Pure white flowers of medium size, blooming profusely in large clusters throughout the summer. A medium strong grower.

Golden Rambler. Not quite so hardy as the other Ramblers, and not so free but blooms for a much longer period. Very fragrant semi-double flowers, deep yellow in bud and pale yellow in bloom.

Philadelphia Rambler. Deep, rich crimson brighter and more intense than the old crimson rambler, with larger, fuller and more lasting flowers.

CLIMBING TEAS.

These are almost all sports from the the bush teas and have their characteristics. We give a list of these without descriptions and you can look back to the list of teas for them. Most of these are strong rapid growers. They are not quite as free bloomers as the teas but after the first

year they give a fair supply, and they are especially fine for cutting as they have long stems and fine foliage.

Climbing Clothilde Soupert,

Climbing Kaiserin.

Climbing Meteor.

Climbing Wooton.

Climbing Malmaison.

Climbing Hermosa.

PRICE SAME AS EVERBLOOMING TEAS.

AMERICAN BEAUTY.

Everyone knows the **American Beauty**, the most popular rose of the day for cutting. It is as hardy as an oak and makes good growth and blooms well where the soil suits it, but it is not usually at its best here, although in most places it will make a fair growth and give some fine flowers every year. Very fragrant; deep rosy crimson. **Price, 1yr., pots, 15cts each, 2yr. from pots or field, 35cts each.**

CONRAD F. MEYER.

A hybrid of the old **Rugosa** or **Sweet Briar**. Pure, silvery pink double flowers, surpassing all others of the **Rugosa** family in beauty of color and fullness of form. Fragrant and hardy; handsome in foliage and valuable as an ornamental shrub.

Price, 1yr., from pots, 15cts each. 2 yr. field grown, 35cts each.

House and Bedding Plants.

We have aimed in this list to quote such varieties as are popular and worthy of culture, discarding obsolete varieties or those lacking in vigor or desirable qualities. We can usually supply anything quoted in this department at any season of the year, except as noted in the descriptions. PLEASE READ THE RULES ON INSIDE OF FIRST COVER REGARDING PLANTS BY MAIL OR EXPRESS. Our plants are not grown in a close damp atmosphere under high temperature, causing a rank soft growth and poor root action, but they are sturdy and will suffer but little by the change to the house or garden.

All plants are from 2 1-2 inch pots unless otherwise noted. We almost always have a supply of larger sizes if preferred, but do not list them as the prices vary so much and our space is limited. Should you wish large specimen plants of any variety let us know and we will quote them.

ABUTILON.

Popular for pot plants or for summer bedding. Flowers are bell shaped, of many colors, and bloom all summer.

Savitz. A Japanese variety, with foliage variegated green and white. Dwarf, compact grower.

Splendens. A beautiful deep red variety, dwarf in habit and always in bloom.

Snow Storm. A large pure white variety, showy and attractive.

Price, 10 cents each.

ACHYRANTHES.

For beautiful foliage these rival the **colous.** and are much less apt to burn. Do well in dry sandy places. We can supply both the red and yellow varieties.

Price, 5 cents each.

AGERATUM.

For summer bedding or for pots in the house these are very satisfactory.

Blue Perfection. A strong dwarf grower with fine foliage and deep blue flowers.

White Cap. Flowers pure white. Strong compact grower.

Price, 5 cents.

ASPARAGUS.

Plumosus. The most popular plant of today. May be used with effect in fern dishes, or as a single pot plant; may be trained to grow over windows or small trellises in the house, and above all is almost indispensable as a green in floral work. Its fresh green foliage is so graceful and dainty that it surpasses even the **Maiden Hair Fern** in popularity.

Sprengeri. A beautiful variety of this graceful class of plants, especially useful to grow as a pot plant for house decoration or for planting in hanging baskets, where it makes a graceful drooping plant with branches or fronds four to five feet in length, of a rich shade of green.

PRICE, 10 cents each.

LEMON VERBENA.

No garden is complete without it. You should have some of it for use in bouquets as it's delightful fragrance exceeds that of any other plant's foliage.

PRICE, 10 cents each.

BEGONIAS.

Probably the most popular and most satisfactory class of house plants grown. Most every one succeeds with them almost everywhere. The great variety of shapes, colors and markings in the foliage and of color and form in the flowers, make a collection of begonias one of the most beautiful and interesting features of any window garden.

PRICE, unless noted, 10 cents each.

Alba Picta. Leaves glossy green, thickly spotted with silvery white; flowers white.

Dewdrop. A remarkably free flowering pure white variety, with shining green leaves; always in bloom, summer or winter.

Argentea Cuttata. A handsome foliage variety, purple bronze leaves, oblong in shape with silvery markings; white flowers. This is one of the most popular begonias we handle.

Flambeau. Exceedingly free flowering, commencing to bloom when very small and flowers continually. Color deep rosy pink, changing to delicate light pink. A reliable bedding variety, flowering fully as free when planted in the open ground as when grown in pots in the house.

Erfordia. We can recommend this variety as one of the very best. It grows in symmetrical compact form, with shining green foliage, continually covered with clusters of bright rosy salmon flowers.

Manicata Aurea. Large, glossy leaves, beautifully blotched with creamy white, with carmine etchings in the mature leaves. Flowers delicate blush white on long stems.

Price, 15 cents each.

Metalica. A shrubby variety, good grower and free bloomer; leaves triangular, under side of leaf and stem hairy; surface a ustrous metallic or bronze color, veined darker; flowers white.

Otto Hacker. A strong vigorous grower, of fine upright habit, with shining deep green leaves eight to ten inches long. Flowers bright coral red, borne in immense clusters.

Paul Bruant. Leaf fine pointed, large and smooth; flowers in large panicals, so freely produced as to nearly cover the plant. Color light rose.

Rubra. This Begonia is still a great favorite. The flowers are a rich coral red, hanging in large pendant clusters; these with the rich green foliage, make one of the best plants for house culture.

Thurstoni. A beautiful stately plant with remarkably handsome foliage. The under side of the leaves is a rich purplish red, the veinings very prominent, while the face or upper side, is a bronzy green, shaded with crimson and olive, with a peculiar glossy metallic lustre over all. Flowers rosy white in large clusters.

PRICE, 15cts EACH.

M. de Lesseps. Large leaves beautifully spotted with silver. A very strong free growing variety.

Sanguinea. A showy variety, with very large leaves; upper side of rich olive, under side crimson, and of a peculiar leather like substance. Dainty flowers, light rose to white.

Speculata. A splendid begonia of the Rex type. The leaves are in the form of a grape leaf. Color a bright green, with a background of chocolate; veins a light pea green, the whole leaf spotted with silver.

PRICE, 15cts EACH.

Verron. A good, hardy, showy bedding begonia; flowers bright crimson, foliage green, turning bronzy red in the sun.

Beefsteak. This begonia has an unpronounceable name but is generally known as the Beefsteak and so we list it thus. Resembles the Rex family in habit of growth but the leaves are round, smooth, olive green on top and red below, thick and leathery. One of the very easiest varieties to grow and always beautiful.

CARNATIONS.

We have fine young plants of all the leading varieties after February 1st and strong field grown plants after August 1st. Below we give a list of varieties and colors but as the habit of growth is very similar in all varieties we do not give any lengthy descriptions.

ENCHANTRESS, very light pink.

HARLOWARDEN, dark velvety crimson.

MRS. LAWSON, deep cerise pink.

BOSTON MARKET, pure white.

WHITE LAWSON, pure white.

PROSPERITY, white, splashed with pink.

PATTEN, variegated.

ELDORADO, yellow penciled red.

AMERICA, scarlet.

WHITE PERFECTION, pure white.

PRICE, small plants, 5 cents each.
Large, field grown, 15 cents each.

CHRYSANTHEMUMS.

We have an exceptionally fine assortment of chrysanthemums, the queen of Autumn flowers. We supply these in small plants from Feb. 1st until July, and large tree-shaped, field grown, specimen plants from August 1st until November.

PRICES.

Small plants, 5 cents each. Large specimen plants from the open ground in August, 50 cents each.

Amateur Conseil. A first class reflexing red of velvety texture and large size; semi-dwarf and medium early. Splendid in habit of growth.

Clementine Touse. Largest early white; stem, foliage and flower fine; splendid keeper.

Col. Appleton. Large, medium early incurved yellow. Strong grower with deep, finely formed flowers of golden yellow.

Dr. Enguehard. Large, clear pink of fine form; robust grower. Medium early.

Early Snow. A fine incurved white, coming in at the same time as Polly Rose, and even finer and larger than that popular variety.

Golden Wedding. Nothing finer among loose recurved yellows; shines like burnished gold; large flower and strong grower.

Ivory. A gem among whites for either specimen plants or cut flowers. Rather dwarf grower; midseason.

John Burton. A beautiful clear pink incurved of large size and fine form; very late.

Jeannie Nonin. A very late white; large globular flowers; splendid keeper.

Mrs. Coombes. Bright, lavender pink; flowers very large with broad reflexing petals; early midseason.

Mrs. Perrin. Splendid globular pink, of perfect finish; fine stem and foliage; early midseason.

Maud Dean. One of the best of the late pink varieties; color fine.

Maj. Bonnaffon. This splendid incurved yellow is still very popular. Of dwarf compact growth.

Mme. Bergman. Very early white; flowers are as round as balls when fully expanded.

Monrovia. Earliest of all yellows and of fine form and size.

Polly Rose. Very easy to grow; extra early white; compact growth and large flowers if properly disbudded.

Wm. Duckham. Early mid-season pink; sturdy growth; flowers of fine form.

W. H. Chadwick. Magnificent late white; large size and fine form.

Rosiere. A deep lavender pink, loose,

recurved variety of large size. Early.

Black Hawk. The darkest Chrysanthemum grown. Rich, velvety crimson. A large flat flower.

White Bonnaffon. Very similar to Maj. Bonnaffon in form of flower and habit of growth. Color pure white; mid-season.

POMPOM VARIETIES.

The Pompoms are great favorites as pot plants. They are very double, perfectly formed flowers, sturdy tree shape growth, hardy everywhere.

Alena. Light pink.

Black Douglass. Fine dark red.

Button. Pure white.

Angelique. White, tinted creamy yellow.

Zenobia. Pure golden yellow.

COLEUS.

There is nothing in the line of bedding plants that can ever take the place of Coleus. There are many of the bright and fancy leaved varieties that are handsome. We have a fine assortment in plain light and dark green, yellow and red; also red yellow and green in numerous variegations.

Price, 5 cents.

FERNS.

These are the most graceful of all the decorative house plants. Growers are constantly seeking to improve the old varieties and have succeeded in producing many distinct types. We quote the best of these below.

Boston Fern. (*Nephrolepis Bostoniensis*.) One of the finest decorative plants ever introduced. Grows rapidly under all conditions. Often called the "Fountain Fern" on account of its graceful drooping habit. Fully matured fronds often reach four feet in length.

Pieroni. (*Ostrich Plume*.) The demand for this variety has been remarkable and it seems to give excellent satisfaction. It has the same vigorous habit of growth as its parent, the Boston Fern, but its pin- or leaflets are again subdivided, making each a perfect little frond or leaf.

Whitmani. This is an improvement over the Pieroni, being more compact, much more finely subdivided, with light wiry stems and graceful drooping habit even in smaller plants.

PRICE, either above three varieties.

2 inch pots, 10 cents each. 3 inch, pots, 25 cents each.

Besides the above we can supply the SILVER FERN, medium large branching fronds, light green, heavily overlaid with silvery white. PTERIS TREMULA, (Quaking Fern), so called because of its airy foliage; MAIDEN HAIR, the daintiest fern grown, used extensively in cut flower work. HOLLY FERN, a thick leaved, dark green variety; and several other varieties. These ferns like a cool moist atmosphere and do not

do well in a hot dry room.

Price, 15 cents each.

FUCHSIAS.

Valuable for window garden or for protected and partially shaded position in the garden.

Price, 10 cents each.

Jupiter. A mammoth flowered double purple variety. Strong upright grower.

Black Prince. This is the most popular fuchsia grown. Large, single, bright red corolla, and rosy sepals. Fine symmetrical grower and free bloomer.

Phenomenal. Extra large, double purple corolla, crimson sepals.

Mrs. E. G. Hill. Double white corolla, and brilliant red sepals.

GERANIUMS.

These old favorites can never be superseded by any bedding plants. We have tested all the leading varieties and you may depend on our descriptions being accurate and suited as near as possible to our climate. The Bruant type stands the sun best, has thrifty bright green foliage, and makes a strong stocky growth.

PRICE, small plants, 5 cents each.

Apple Blossom. Single; light pink; large florets.

Alphonse Ricard. Single Bruant. Very large orange-scarlet florets in immense trusses.

Brilliant. Single; deep, rich, velvety scarlet; very free.

Double-Dryden. Double. A 'fancy' geranium, salmon pink, shading lighter and darker.

Fairy Queen. Double. Each petal white at edge, shading to deep pink at center. A favorite variety for the window garden.

Happy Thought. A fancy leaved variety. Center of leaf creamy yellow. Flowers of good size, single, scarlet.

Jean Viaud. Single Bruant. Clear, rosy pink shading to a white eye. Stands the sun well.

Kieher. Double; Dark crimson, almost purple. Darkest geranium we have.

La Aube. Single; pure white. Has very large clusters.

La Favorite. Double, pure white. This is an old standard variety, still popular.

Mad. Jaulin. Double Bruant. Color, white center shading outward to delicate pink.

Mad. Landry. Double Bruant. Salmon pink, shading to copper. Large florets in large clusters.

Mrs. E. G. Hill. Single Bruant. Salmon pink. Not as hardy and robust as the

other Bruants, but flowers are very fine in color and size.

Marquis de Castellane. Bruant. Bright rosy scarlet. A dwarf grower with immense flowers.

Mme. Chevreliere. Double, pure white. Resembles the Bruant in style of flower and habit of growth.

Precurseur. Single Bruant; pure white. The only white Bruant.

Rosea. Semi-double. Rosy-crimson.

Bed of Gold. Double; orange scarlet. A splendid bedder and the nearest yellow we have in geraniums.

Rosebud. Very double; perfect little rose-like florets; deep crimson.

Thos. Meehan. Single Bruant. Bright magenta. Very popular.

ROSE GERANIUM.

The true rose geranium with fine cut fragrant foliage.

IVY-LEAF GERANIUMS.

We have these in white, pink, and bright red. Make good hanging basket plants.

HELIOTROPES.

The Heliotrope is an old favorite and deserves its popularity. It is easily grown either in pots in the house or in the open ground. Has a delightful penetrating fragrance. We can supply either the white or the purple.

PRICE, 10 cents each.

HIBISCUS.

Strong growing tropical plants with handsome glossy foliage and large, brilliant, showy flowers. In a warm sunny room make fine decorative plants and bloom profusely. If planted in the open ground during the summer they make a gorgeous display with their enormous bright colored flowers.

We can supply these in double and single red and pink, including the new pink double "Peachblow."

PRICE, 10 cents each.

HYDRANGEAS.

These tender Hydrangeas bloom early in the spring. Their flowers are borne in immense trusses; bright pink; They are very easy to grow, as they may be grown in the open ground during the summer, and wintered dormant in a cool place, even a little frost not hurting them,

PRICE, 10 cents.

IMPATIENS SULTANA.

One of the prettiest and most satisfactory house plants for winter blooming as well as a fine summer bloomer in the garden. They commence blooming when very small and are seldom without bloom. We have the carmine-rose and the salmon-

WEeping LANTANA.

A grand plant for baskets and vases. A good winter bloomer and also a fine carpet bedder for the garden in summer. Flowers a delicate rosy lilac, borne very freely.

PRICE, 10 cents each.

MANETTIA.

A pretty house climber with small tubular flowers of brilliant scarlet, shading in to yellow at the tips.

PRICE, 10 cents.

MOONFLOWER.

A climber that grows and blooms well for everyone. Attains a great height if planted in a sunny location in deep rich soil. The flowers are five or six inches in diameter and borne freely all summer. We can supply the pure white and the deep violet blue.

PRICE, 10 cents each.

PELAGONIUMS.

Better known as Martha Washington geraniums. They bear extremely beautiful flowers, of large size, perfect form and rich coloring. They bloom freely during the Spring and early summer. We list below the best but we can supply several other varieties if desired.

PRICE, unless noted, 10 cents each.

Mrs. Sandiford. Very large flowers, pure white, with ruffled edges, often double or semi-double

Thibaut. Flowers three inches in diameter, beautifully ruffled, bright pure pink.

Victor. One of the most beautiful. A light pink at the edge shading deeper, with dark maroon blotches on upper petals.

Quito. Very large, pink, shading to white at the center. A favorite.

Diadem. Pure white, except a deep maroon blotch on upper petals.

PETUNIAS.

Double fringed flowers of immense size. Old favorite. We have several colors, from pure white to deep purple, and variegated.

Price, 10 cents each.

VIOLETS.

Of all delightful perfumes that of the Sweet Violet is the most delicate and pleasing. If wanted for blooming in the house they should be kept cool as they do not do well in a hot room. The single varieties will often give some flowers out doors during winter if planted in a sheltered spot or in a coldframe.

PRICES.

Small plants, 5 cents each. Large specimen plants from the open ground in August, 25 cents each.

Nursery Stock.

All stock offered by us is too large to be sent by mail. We do not send out those small culls as any healthy tree will grow much too large for mailing the first year. We take great care to have our stock true to name and should any prove to be otherwise we will replace or refund the purchase price. In sizes the calliper, (diameter five or six above the ground,) governs, and the height is given as the usual height of such sizes. A short stocky tree is usually preferred to a tall slender one. We list only the well known standard varieties and such new varieties as have proven their value.

APPLES.

PRICES.

2-4 inch caliper, up, 6 to 7 ft.,	20 cts. each,	\$19. per 100.
5-8 to 3-4 inch, 5 to 6 ft.	16 " "	15. " "
1-2 to 5-8 " 4 to 5 ft.	12 " "	11. " "
3-8 to 1-2 " 3 to 4 ft.	10 " "	9. " "

SUMMER.

Early Harvest. Medium size; pale yellow; fine flavor, sub-acid; very productive.

Golden Sweet. Large, yellow; Fine sweet apple. August and September.

Red Astrachan. Large, crimson, juicy, with rich, sub-acid flavor. Bears early.

Red June. Medium size, deep red, productive.

Yellow Transparent. Earliest and best; fruit large, pale yellow, sub-acid; a very early bearer,

AUTUMN.

Duchess of Oldenburg. Good size, yellow,

streaked red, juicy, rich sub-acid, productive.

Maiden's Blush. Large, beautiful, pale yellow with red cheek. Sub-acid.

Famouse. (Snow.) Medium size, deep crimson, flesh very white, tender, crisp, and juicy; sub-acid.

Rambo. Medium size, streaked with red, rich, sub-acid.

WINTER.

Arkansas Black. Large, dark red, flesh yellow, firm and crisp, sub-acid; a long keeper.

Baldwin. Large, bright red, crisp and juicy, sub-acid. Vigorous and productive.

Ben Davis. The great market apple of the West and South. An early bearer and yields an immense crop of large, bright red, streaked fruit.

Golden Russet. Medium size, dull russet, very tender, juicy, rich sub-acid.

Grime's Golden. Good size, yellow, of highest quality, very productive.

Rhode Island Greening. Large, greenish yellow; flesh yellow, fine grained, tender, crisp, and juicy. Fine for cooking.

Rawle's Janet. Yellowish green, striped with red; crisp, juicy and rich.

Jonathan. Medium size, red, fine quality.

Mammoth Black Twig. Resembles the Winesap in every respect except the fruit is much larger.

Missouri Pippin. Large size, handsome, and of fair quality. Early and abundant bearer. Good market variety.

Gano. An improved Ben Davis; color, deep red,

Winesap. Medium size, deep red, firm, crisp, rich sub-acid. Widely planted.

Belleflower. Large, oblong, rich yellow color, tender, juicy, crisp.

Rome Beauty. Large, yellow, striped with red, tender, juicy, sub-acid.

N. W. Greening. Very large, greenish-yellow; flesh mild, pleasant sub-acid.

CHERRIES.

The cherry is one of the most ornamental of the fruit trees, and is also very profitable. They bear young and almost sure to yield every year, and the fruit always brings good prices. The sweet cherries make larger trees than the Duke or Morello types, but are not so hardy and not so generally planted, though they will stand our winters without danger.

PRICES.

3-4 in. cal. 5 to 6 ft.	60cts.	\$50. per 100.
5-8 to 3-4 in. 4 to 5 ft.	50cts.	40. " 100.
1-2 to 5-8 in. 3 to 4 ft.	40cts.	35. " 100.
3-8 to 1-2 in. 2 to 3 ft.	30cts.	25. " 100.

HEART and BIGARREAU. (SWEET.)

Fruit heart shaped with tender sweet flesh. Tree of rapid growth, with large soft drooping leaves.

Black Tartarian. Very large, purplish-black, flavor mild and pleasant. Tree a vigorous, beautiful grower and productive.

Gov. Wood. Clear, light red, tender and delicious. Tree vigorous and productive.

Windsor. Fruit large, liver colored. Flesh firm and of fine quality.

DUKE and MORELLO.

Trees are of smaller size than the sweet varieties, and more compact. Fruit round, usually acid, ranging in color from light red to almost black.

Baldwin. Tree upright, vigorous and productive. Fruit large, red, almost black when fully ripe, sweetest and richest of

morello type. Early.

Dyehouse. A very early and sure bearer; ripens about with Early Richmond, and of better quality.

Early Richmond. A very early, bright red variety; healthy and productive.

Large Montmorency. Fruit very large, fine flavor, bright red; ripens between Early Richmond and English morello.

May Duke. Large, dark red, juicy, rich. Vigorous and fruitful.

English Morello. Large, dark red, nearly black; tender, juicy, acid, rich.

Wragg. Very hardy, vigorous and productive; Fruit medium size, purple, of fine quality; late.

PLUMS.

There are numberless varieties of plums; differing widely in habit of growth, color size and quality of fruit, and time of ripening. We list most of the standard varieties. Most varieties have not been tested enough here to decide their value. If you plant your plums in your poultry yard you will be bothered but little by insects.

PRICES.

3-4 in. cal., 6 to 7 ft.,	40cts.	\$35. per 100.
5-8 to 3-4 in., 5 to 6 ft.,	35cts.	30. " 100.
1-2 to 5-8 in., 4 to 5 ft.,	30cts.	25. " 100.
3-8 to 1-2 in., 3 to 4 ft.,	25cts.	20. " 100.

Abundance. The most popular Japanese, and a valuable market variety; very productive and yields almost every year. Fruit large, showy and of good quality.

Bradshaw. Very large, early, dark violet red; tree erect and vigorous; very productive.

Barbank. A profitable market variety. Tree hardy, sprawling, and productive. Fruit large, cherry red, with lilac bloom.

Damsor. Medium size, dark purple, fine for preserving; productive.

De Soto. Very hardy, productive, medium size; bright red, good quality, Sept.

German Prune. Medium, oval, blue, rich, juicy, fine. Doubtful whether it will prove productive as tests so far are against it.

Kelsey. Fruit large, heartshaped; rich yellow, tinted light red, with a delicate bloom; flesh firm and melting; small pit. September.

Lombard. Medium size, violet red, juicy and good. Productive.

Moore's Arctic. Small, purplish black, juicy, sweet. Immense bearer. Hardy in bud and bloom.

October Purple. A strong, vigorous Japanese variety; very large, late, purple; flesh yellow, of superb quality.

Red June. Earlier than abundance, color deep vermilion, large size, good quality;

productive; Good market sort.

Satsuna. A Japanese variety; fruit large reddish purple with a blue bloom; flesh blood red, fine quality; pit very small.

Shippers Pride. Large, dark purple, very showy, often measuring two inches in diameter. Fine, juicy, and sweet; A thrifty grower and productive.

Climax. Vigorous upright grower; productive as Burbank with much larger fruit, often as large as ordinary peaches; deep red; flesh yellow sweet and rich; early as Abundance.

Wickson. Fruit handsome, very large, long, heart-shaped, color deep maroon red, covered with white bloom. Flesh firm and meaty, yellow, rich and aromatic. Cling, small pit.

Yellow Egg. Very large and beautiful; yellow; a little course but fine for cooking.

PEACHES.

The ease with which peaches may be cultivated, their comparative freedom from disease, the short period before they produce, with the immense demand for the fruit and the facilities for shipping it to distant markets, make peach growing profitable.

PRICES.

3-4 inch caliper, up, 6 to 7 ft.,	20 cts. each,	\$19. per 100.
5-8 to 3-4 inch, 5 to 6 ft.	16 "	15. "
1-2 to 5-8 " 4 to 5 ft.	12 "	11. "
3-8 to 1-2 " 3 to 4 ft.	10 "	9. "

Alexander. Cling, medium size, skin greenish-white, nearly covered with red; flesh melting, juicy, sweet. Productive.

Carmen. Large, resembles Elberta in shape, creamy white with deep blush; flesh tender, fine flavored, juicy. Very early.

Champion. A large handsome early variety, creamy white with red cheek, sweet, rich and juicy. Freestone.

Chinese Cling. Fruit large and showy, creamy white, with pink cheek; flesh white, red at the stone, juicy, melting, with rich, vinous flavor. August.

Crosby. A hardy, abundant bearer, medium size, bright yellow fine quality. Sept.

Crawford's Early. A magnificent, large, yellow peach of good quality. Productive, freestone, August.

Crawford's Late. Fruit large, greenish yellow, with red cheek; flesh yellow, free.

Elberta. Large, yellow, with red cheek; flesh yellow and firm; exceedingly prolific, sure bearer and hardy. The leading market variety.

Fitzgerald. Fruit large, brilliant yellow, suffused with red; flesh deep yellow, best quality. Free.

Foster. Large, deep orange red; flesh yellow, rich and juicy. Free. August.

Globe. Large, firm, juicy, rich, vinous, luscious. Free. Late.

Gold drop. Medium size, hardy, and very productive, good quality and early bearer. September.

Heath Cling. Very large; flesh white, juicy and melting. Good keeper and shipper. Late.

Lemon Cling. Large, lemon shape and color, dark red cheek, flesh firm, rich and sprightly.

Lemon Free. Similar to the cling in form and color. Immensely productive.

Old Mixon Free. Large, pale yellow, with a deep red cheek. Tender, rich and good.

Smock. Large, light orange, with red cheek. Juicy and rich. October.

Sneed. Medium size, white, excellent quality, productive. The earliest peach known. Cling.

Triumph. Fruit large, yellow red and crimson. Very early, freestone.

PEARS.

Pears prefer a strong loam, but will do well on almost any land that will produce good crops of vegetables or grain. Pears will keep longer and be better flavored if picked before they are mature, and ripened in the house. By a careful selection of varieties their season can be extended from July to February. Dwarf pears are suited to garden culture, or where space is limited. Are often planted temporarily between apple trees as they yield several years before the apples need the room. It is claimed that dwarf pears planted as a hedge, three or four feet apart and headed low do well and yield immensely. They should be planted deep enough to cover the union where grafted three or four inches. Almost all varieties can be supplied in either standard or dwarf.

PRICES.

3-4 in. cal., 6 to 7 ft.,	50 cts, \$40. per 100.
5-8 to 3-4 in., 5 to 6 ft.,	40 cts, 30. " 100.
1-2 to 5-8 in., 4 to 5 ft.,	30 cts, 25. " 100.
3-8 to 1-2 in., 3 to 4 ft.,	25 cts, 20. " 100.

DWARF PEARS 5 cts per tree less.

SUMMER VARIETIES.

Bartlett. Large size, With often a beautiful blush next the sun, buttery, very juicy, and high flavored; bears early and abundantly. Very popular. August.

Tyson. Medium size, deep yellow with slight russet, red cheek; melting, juicy, of fine flavor. Vigorous and rapid grower.

Wilder. Small to medium, greenish yellow with red cheek. Handsome, sweet, delicious.

AUTUMN VARIETIES.

Duchess. Very large, with rough and

uneven surface, of a greenish yellow color, with a dull red cheek. A vigorous grower and a good bearer. Attains it's greatest perfection as a dwarf.

Flemish Beauty. Large size, greenish-yellow and brown; rich and juicy; An old and esteemed variety.

Gaiber. Noted for vigor, freedom from blight, and heavy bearing. Fruit nearly round, and yellow; excellent for cooking.

Kieffer. Vigorous grower, early and regular bearer; fruit large, rich yellow, tinged with red; flesh white, buttery, and juicy. October.

Rutter. Moderate grower but good bearer; flesh white, melting and juicy, sweet and vinous. October and November.

Seckle. Small size, yellowish russet, with a red cheek; flesh white, buttery, very juicy and melting; the richest and finest table pear grown. Sept. and Oct.

WINTER VARIETIES.

Anjou. A large handsome pear, buttery and melting, with sprightly vinous flavor. Keeps until the winter holidays.

Lawrence. Medium size, yellow, tender and melting. One of the best winter pears.

APRICOTS.

Price same as cherries.

Moorpark. Yellow, with red cheek; juicy sweet and rich, freestone, very productive.

Reysl. Large, yellow, juicy, rich and delicious.

Superb. Medium size, salmon color, of good quality and productive.

QUINCES.

Price same as cherries.

Meech's Prolific. A vigorous grower and immensely productive. The fruit is large, lively orange yellow, of great beauty and delightful fragrance; its cooking qualities are unsurpassed.

GRAPES.

Grapes are the most healthful of all fruits and the most highly esteemed. They may be grown by everyone who has a garden, a yard, or a wall. Given even reasonable culture they seldom fail to yield good crops here.

PRICE.

1 YR. No. 1, 75cts per doz., \$5.00 per 100.
2 " " 1, \$1.00 " " 7.00 " "

Agawam. Large, brownish red; skin thick; pulp tender, juicy and sweet.

Clinton. Bunches small and very compact; berries small with sprightly flavor. Makes a good table grape when fully ripe. Color, black.

Catawba. Bunches large and loose; berries large, of copper-red color; sweet rich, musky flavor; must have good soil and culture to succeed.

Diamond. Bunch large and well filled, flesh melting and juicy, sweet; skin thin and tough. Color, white.

Lindley. Bunch medium size; berry medium to large; rich red, very handsome; flesh tender, sweet and rich.

Niagara. Bunches very large and uniform; berries larger than concord, clear white, with yellow tinge when ripe, very much like Concord in quality.

Vergennes. Very productive, clusters large, berries large, light amber, meaty and tender, rich and delicious.

Worden. Bunch large, compact, handsome; berries large, purplish black; earlier and better quality than Concord.

PRICE. (Varieties below,

1 yr. No. 1, \$1.00 per doz. \$6.50 per 100.
2 yr. No. 1, 1.25 " " 8.00 " "

Brighton. A superb table grape. Rich wine red, delicate skin, tender flesh, almost seedless, sugary and rich. Early and productive.

Delaware. One of the finest table grapes. Bunches small and compact, berries small, thin skinned, light red, juicy sweet and delicious.

Moore's Early. Bunch large, berry good size, color black, quality better than Concord. Two weeks earlier.

PRICE. (Varieties below.)

1 yr. No. 1, \$1.25 per doz. \$8.50 per 100.
2 yr. No. 1, 1.80 " " 12.00 per 100.

Campbell's Early. Clusters large and handsome, berries large, round and black, flesh firm but tender, seeds few, flavor rich, sweet and vinous, ripens early and keeps well.

Eaton. Bunch very large, compact; berries extra large, often an inch in diameter; round and black with a heavy blue bloom; skin thin and tough, pulp tender and juicy.

CONCORD.

1 yr. No. 1, 50cts per doz. \$3.00 per 100.
2 yr. No. 1, 60cts per doz. 4.00 per 100.

The concord is the old standby and is still more heavily planted than any other. It is a very popular market variety and succeeds almost everywhere. Bunch and berry medium to large, fair quality, medium early.

GOOSEBERRIES.

This fruit is so useful for cooking green or ripe that they should be more extensively if they will succeed here. We do not think they have been tested enough to

to judge very well as to their adaptability.
PRICE.

1 yr. No. 1. \$1.00 per doz. \$8.00 per 100.
2 yr. No. 1. 1.50 per doz. 12.00 per 100.

Downing. Large size, oval, greenish white, stiff strong shoots, heavy foliage, protecting the fruit from the sun. Bears abundantly.

Houghton. A vigorous American sort. Very productive, free from mildew; medium size, smooth, pale red, tender sweet and delicious.

Smith's Improved. One of the largest American varieties. Oval, light green when ripe, sweet and excellent.

RASPBERRIES.

Raspberries are equally desirable for planting in the garden for home use, or in the field for market. We have had black raspberries bearing for three years, and find they do well here. They make a strong rapid growth, and so far are free from disease. The red raspberries, we think will do as well.

30cts per doz., \$2.00 per 100.

Cuthbert Red, large, conical; deep, rich crimson; firm; of excellent quality.

Golden Queen. Rich golden yellow. The flavor is of the highest quality. In size equal to the Cuthbert. immensely productive.

Loudon. Red; Canes strong and hardy and wonderfully productive. Berries large beautiful and of fine quality. Very desirable for home or market.

Gregg. Of great size, fine quality, productive. The standard black-cap.

Kansas. Jet black, firm and delicious. As large or larger than Gregg. The hardiest variety known.

BLACKBERRIES.

Early blackberries are a sure crop here and the late sorts usually give good crop unless the summer is very dry.

Early Harvest. The earliest blackberry, and valuable for market. Berries small and sweet. 25c per doz., \$1.50 per 100.

Snyder. Extremely hardy, productive, good size. No hard sour core.

30cts. per doz., \$2.00 per 100.

Rathbun. Berry exceedingly large, sweet, and luscious, without hard core. Forms a compact bush and yields heavily. Does not sprout but roots at tips like raspberries. 50 per doz., \$3.50 per 100.

Ohmer. Hard, late, large, productive and fine flavored. Strong grower.

40cts. per doz. \$3.00 per 100.

STRAWBERRIES.

Strawberries succeed as well as anyone could ask. For seven years we have had but one season that our plants did not

yield heavily. They need no protection. The ground should be well prepared, the plants set as early in the spring as the ground is in condition, and thoroughly cultivated. Varieties marked (p) are pistillate and will not bear unless a perfect flowering variety is planted with them. The smallest garden should have a bed as their culture is easy and returns sure.

60cts per 100, \$5.00 per 1000.

Brandywine. A fine, large, late, handsome, productive variety of excellent quality; regular conical form, dark glossy red. Plant healthy, vigorous and productive.

Bubach. (p) Large and uniform size, fine form and color. Unsurpassed for productiveness and vigor. A leading market sort.

Crescent. (p) Medium size, vigorous and productive. An old standard variety.

Glen Mary. Berries large to very large, often flattened, bright deep red, sweet, rich, and fine flavored. Productive, and holds its size well to the end of the season.

Gandy. A reliable late sort, large and firm, very uniform in size and shape.

Jessie. A large, handsome, dark red berry. Strongly staminate; a fine fertilizer for pistillate sorts.

Michel's Early. Medium size, bright crimson, fair quality. Very early,

Nick Ohmer. Very large and stocky, healthy, vigorous and productive. Fruit of the largest size, fine form, dark glossy red, firm and of excellent flavor.

Warfield. (p) Early, productive, firm, and of fine quality. Very popular.

CURRENTS.

Currents have not proven very satisfactory here but may succeed better as the country becomes older. They make strong healthy growth. Give them a trial.

Fay's Prolific. The leading market variety. Extra large stems and berries, uniform size, easily picked, exceedingly productive.

NUTS.

Almost every farm contains land that should be planted to nut trees adapted to the soil. Probably no branch of tree cultivation pays larger profit or is assured of a better market for all produced, nuts often paying far better than farm crops or fruits, while most kinds are making growth of valuable timber that will of itself pay a large percent on the investment.

Butternut. A fine native tree, producing a large longish nut, which is highly prized for its sweet, oily, nutritious kernel. As easy to grow as the black walnut.

18 to 24 inch, 25cts each. \$20. per 100.
2 to 3 ft., 35cts " " " "

Japan Chestnut. Very distinct from all other chestnuts, dwarf grower, productive, usually producing nuts when two or three years old. 2 ft., 40cts. each.

English Filbert. Of the easiest culture, growing six to eight feet high, entirely hardy and one of the most profitable nuts to grow, succeeding on almost all soils, bearing early and abundantly.

2 to 3 ft., 40 cts. each.

Japan Walnuts. (Seiboldi or Max Cordiformis.) Perfectly hardy, rapid growers, making handsome trees with immense leaves. Sieboldi produces long oval nuts, resembling Butternuts in shape and quality, only smaller, and borne in cluster. Max Cordiformis bears broad pointed nuts, resembling the shell-bark hickory-nut.

2 to 3 ft., 40cts each.

EVERGREENS.

We are making a special effort to have a fine line of evergreens of all sizes, of such as seem adapted to this climate. Not all the varieties listed have been given a sufficient test, as yet, to fully determine their value, but we think most of them will do well. The Japan Cypress has proven an exceptionally rapid grower, and as it has fine feathery foliage, and is loose and graceful in its habit, we believe it will become very popular. All the Arbor-vitae, the Irish Juniper, and the Red Cedar, do well, and so far our Spruce and Pine are thrifty and growing well.

PRICE LIST.

	8to12 in.	12to18 in.	18to24 in.	2to3 ft.	3to4 ft.
Arbor-vitae, Pyramidal,	\$0.15.	\$0.25.	\$0.50.	\$0.75.	\$1.25.
" American,	.15.	.25.	.30.	.40.	.50.
" Rosedale,	.15.	.25.			
" Hovey's Golden,			.60.	.90.	1.25.

Douglas Fir,				.85.	1.25.
Spruce, Norway,	.15.	.25.	.30.	.40.	.60.
" Black Hill,	.25.	.35.	.50.	.75.	1.25.
" Colorado Blue,	.50.	1.00.	1.25.		
Pine, White,	.15.	.25.	.40.	.50.	1.00.
" Scotch,	.15.		.40.	.50.	.75.
Irish Juniper,	.15.	.25.			
Red Cedar,	.15.	.35.	.60.	1.00.	
Japan Cypress,	.15.	.25.	.35.	.50.	

We take great care in handling and packing our evergreens to keep the roots from becoming the least bit dry. In planting be particular to see that the roots are not exposed to the air for any length of time, for if the resinous sap once dries in the tips of the roots they will scarcely ever grow.

LARGE LEAF EVERGREENS.

These have shining green leaves, in all cases retaining their color until past mid-winter and often the year round. The Euonamous, Privet and Box make fine ornamental hedges, though the Box is of slow growth.

Magnolia Grandiflora. The Magnolia is a magnificent flowering evergreen tree with large glossy green leaves. Grows to large size and bears immense pure white flowers, resembling mammoth Cape Jasmine buds in form and having a similar fragrance. 1ft., 25cts.; 2ft. 50cts.; 3ft., \$1.00.

PRICE, (FOR FOLLOWING VARIETIES.)
6 to 8 inch, for hedges, \$5.00 per 100.
8to12in. 15cts each, 12to18 in, 25cts each

Euonamous Japonica. One of the fastest growing evergreen shrub, suitable either for hedge or single specimen; can be greatly improved by cutting back to in-

duce bushy form; called large leaf box by many.

Euonamous Variegata. Variegated variety, with leaves conspicuously margined with white, and constant in its colorings.

California Privet, wherever a close compact hedge is desired we recommend California Privet. Should be planted 8 or 10 inches apart to give best results.

English Box. It is of rather slow growth, compared with other evergreens, but is remarkable for its long life and finally attains a height of ten or twelve feet. The foliage is small, light green, and retains its color all winter.

Amoor River Privet. The best hardy evergreen privet for hedges south of the Ohio river. Leaves small, light green; flowers white in typering racemes; branches light and wiry.

SEEDLING TREE AND HEDGE.

We can supply one year seedlings of all the following deciduous trees, also Osage Orange hedge. We do not keep a large stock of these on hand, but will procure any number desired on short notice.

Black Locust,

6to12 in.,	75c per 100,	\$4.00 per 1000.
12to18 in.	\$1.00 " "	6.00 " "
18to24 in.	1.50 " "	8.00 " "
2 to 3 ft.,	2.00 " "	10.00 " "

Ash, Honey Locust, Maple, same price per hundred, \$1 on the 6to12 in., and \$2 on the other sizes, per thousand higher than the above.

Catalpa Speciosa, and Russian Mulberry, 25c per 100 \$2 per 1000 higher than Locust on 6to12 in., 50c per 100, \$4 per 1000 higher on other sizes.

Osage Orange Hedge, \$4 per 1000.

We can supply large transplanted stock of the above and many other shade trees at from 25 to 60 cents each. We have on hand now a fine lot of Sycamore and White Ash, 6 ft., at 25cts each.

UMBRELLA TREE.

This is a very popular ornamental tree where hardy, and there are many fine specimens growing in Perry. It is of very rapid growth, and should it be killed back by a severe winter it will send up strong shoots and soon be as pretty as ever.

5 to 6 ft., 60 cents each.

HARDY SHRUBS.

There are an immense number of hardy flowering shrubs but a large proportion are hardly worth cultivating. We aim to keep all the best sorts. In size, the plants we supply are from 18 inches to 3 feet according to the habit of the shrub.

PRICE, 35 cts each, \$3.00 per dozen.

Altheas. These are probably the most satisfactory blooming shrubs for this locality. They make a rapid strong growth, begin blooming early in the summer and continue until stopped by frost. Flowers are large, double and borne in profusion the first year and every year. Make lovely ornamental hedges when trimmed to the desired form. We can supply the light pink, deep pink, red, purple and white, all choice double named varieties.

Almond. More compact round clumps, covered very early in the spring by a mass of pure white or bluish pink double bloom.

Calycanthus. The old fashioned spice-wood. Brownish purple, shell-like flowers. Very fragrant.

Cydonia Japonica. (Japan Quince.) An early blooming shrub. Makes a fine hedge as it naturally grows in good form and admits of any amount of trimming. Is a mass of deep scarlet bloom early in the spring.

Deutzia Lemoine. This we consider the very best Deutzia, being a surer and earlier bloomer than the old Crenata, with finer flowers. One of the finest hardy flowering shrubs grown. Flowers pure white.

Hydrangea Paniculata Grandiflora. Two well known to need a lengthy description. Probably the most popular of all shrubs. Blooming in August and September when but few other shrubs are in bloom. Flowers are white, borne in pyramidal panicals often a foot in length. An excellent plant for masses or for single specimens.

Spirea, Anthony Waterer. Makes a compact dwarf bush 18 inches to 2 feet high, and in the spring, about Decoration day, is a mass of crimson bloom, and continues to bloom more or less freely all summer. This Spirea is one of the best.

Spirea, Van Houtte. The grandest of all the Spireas when in bloom, being a complete fountain of pure dazzling white. It comes into bloom the latter part of May. Even when not in bloom it is a beautiful bush.

Spirea, Prunifolia. (Bridal Wreath.) A beautiful Spirea, resembling the Van Houtte in habit of growth, but not so light and airy. Small white double flowers in dense clusters, and borne so freely as to almost hide the bush.

Spirea, Billardia. This is an everblooming Spirea, entirely different in form of flowers, which are borne in long dense spikes, rosy pink in color.

Wegelias. Beautiful shrubs that bloom in June. The flowers are produced in great profusion, pink, rose and dark red. We can supply either color.

Snowballs. The old fashioned snowball does well here, blooming freely every year.

Lilacs. Old garden favorites of our grandmothers. We can supply the purple or the white as desired.

Syringa. (Mock Orange.) A beautiful white flowering shrubs. Fragrant.

HARDY PERENNIALS.

Among the hardy perennials we find many of the old fashioned favorite. They are easily grown, are very hardy, require very little care, and improve as they become established. We quote strong field grown dormant roots.

Anemone. (Wind Flower.) There is nothing more beautiful in the intire list of hardy plants. They commence to bloom in August and increase in beauty until frost. 25 cents each.

Columbine. These are plants of elegant habit, distinct in foliage and flowers. The flowers form a showy crown, well above the fine cut leaves. They like partially shaded locations, and are especially fine

for planting under trees. 20cts each.

Campanula. (Canterbury Bells.) One of the old favorites. Grows two to three feet high; flowers produced in racemes. We offer the blue and the white. 20cts.

Delphinium. (Perennial Larkspur.) An old fashioned flower which has again come into prominence, and is being used with telling effect in parks and public grounds. They are about the only blue hardy flower of any note that has a long season of bloom. Care should be taken to remove all old flower stalks before seed pods are formed; in this way larger flowers are produced and the season prolonged. 25cts each, \$2 per dozen.

Sweet William. Makes a fine display in the garden. Flowers perfectly double, rich and varied coloring. Beautifully marked.

Bleeding Heart. One of the most beautiful hardy plants. Blooms in the early spring, with rose-colored, heart-shaped flowers, hanging from the underside of branches their entire length. Perfectly hardy and easily cultivated. 25cts each.

Shasta Daisy. A perfectly hardy, large, free flowering white daisy. With good soil and plenty of water they will give flowers three and four inches in diameter. Blooms freely from July until frost. 20cts each.

Digitalis. (Foxglove.) An old fashioned flower that should be more freely planted. Succeeds under all conditions and makes a grand display during July and August. The flowers are very showy with a wide range of color and a great variety of markings, from pure white to deep Purple. Three to four feet high. 25cts each.

Funkia. [Day Lily.] There are several varieties of these. **CORDATA** has large, broad leaves and pure waxen white flowers. **VARIEGATA**, large leaves, variegated yellow and green. Flowers deep blue. 20cts each.

Hollyhock. For planting in masses by itself, or as a background for lower growing plants, the Hollyhock cannot be dispensed with, an old fashioned plant becoming popular again. We offer both the old-fashioned double and the giant fringed. 20cts each.

Perennial Poppy. We can supply both the Iceland and large scarlet double. 20cts each.

Platycodon. [Chinese Bell Flower.] An extremely rapid growing plant, blooming constantly from July until late in September. Flowers large, bell-shaped, of a deep shade of blue. Perfectly hardy making a dense branching bush two to three feet high. 20cts each.

Rudbeckia. We can supply both the

PURPUREA, or Cone Flower, a combination of purple, brown, and yellow, in color, and the **GOLDEN GLOW**, a plant growing five to seven feet high, bearing great numbers of double, golden yellow flowers from mid-summer until frost. 20cts each.

Hardy Phlox. Few plants give better satisfaction than these. They thrive in any good soil. The ease with which they are cultivated, their entire hardiness, and the extended season of blooming, combined with their varied and beautiful coloring, make them valuable for garden planting. We can supply pure white and all shades of pink and red. 20cts each.

SUMMER FLOWERING BULBS AND TUBEROUS PLANTS.

Most of these are hardy and may be planted either in the Fall or early Spring, but some like Cannas, Gladioli, and Tuberoses, must not be planted until there is no danger of their freezing.

LILIES.

The Lilies are easy to grow, require so little care after becoming established, and increase in strength, soon forming fine clumps. Lilies should be planted where they can remain, as they resent having their roots disturbed. Plant the bulbs **DEEP**, at least six inches below the surface.

Auratum. (Golden Banded Japan Lily.) Considered by many the finest of all hardy Lilies. Flowers very large, petals broad, pure white, with deep golden band down center, and spotted all over with crimson maroon dots. It is a little hard to get this Lily established. Surround the bulbs entirely with sand when planting. 25cts each, \$2 per dozen.

Speciosum Album. Very fragrant large flowers, pure white. This variety has proven well adapted to this locality, soon forming large clumps and blooming freely. 20cts each, \$1.75 per dozen.

Speciosum Rubrum. Exactly like the Album in every particular except color. It has a deep crimson band down the center of each petal, and also spotted with crimson. 20cts each, \$2.00 per dozen.

Superbum. A strong growing variety, bearing a pyramid of yellowish red flowers about the last of June. 15cts each.

Tigrinum. The hardiest, thriftiest, and easiest to grow of all. Grow four feet, and bear a large number of brilliant orange flowers. They increase very rapidly and soon form large clumps. Every one knows the old Tiger Lily but not all are familiar with the double form. We can supply both the single and double. 15cts each.

Tenuifolium. The lovely Coral Lily of

Siberia. Grows twenty inches high, with finely cut foliage, slender stems, beautiful flowers of a deep coral red. Fine for cutting and make grand clumps on the lawn. Blooms very early. 15cts each, \$1.50 doz.

GERMAN IRIS.

The German Iris is the most commonly grown of the Iris family, and yet we see but few of the many colors. The blue and the white 'Flings' are these. They come in numerous shades of white, yellow, blue and purple, even shaded red. They are so hardy and thrifty they should be generally planted. Mixed, 6cts each, 60cts per dozen. Named, 10cts each, \$1.00 per doz.

IRIS KAEMPFERI.

This is the most magnificent of the Iris family and the one the least grown. The flowers are of immense size, from six to eight inches in diameter, and of the most beautiful and delicate shades. They are perfectly hardy, and flower in great profusion during June and July. A well established plant gives a dozen or more flower stalks two to three feet high, each stock producing from two to four enormous blooms. This Iris thrives best in moist soil, so plenty of water should be supplied while they are growing and blooming. Double and single in numberless shades, markings and combinations of white, blue, yellow, orange, purple, violet and red.

Named sorts, 20cts each, \$1.80 per dozen, Mixed, 10cts each, \$1.00 per dozen.

PEONIES.

Fine hardy plants rivaling the Rose in perfection of flower and coloring. They make an excellent display when well established in clumps on the lawn, and require very little care, as they will grow and do well in almost any soil, but flowers will be larger and the colors brighter, if given a deep rich loam. Old fashioned large, double pink, white and red varieties, 25cts each.

Since the Peony has come again into popularity there have been hundreds of new varieties put upon the market, and great strides have been made in the improvement of this old favorite, and thousands of the cut blooms are sold every year at fancy prices. We can supply a large list of these named sorts at 50cts each.

LILY-OF-THE-VALLEY.

A dainty little flower highly prized by everyone. Pure white bells of exquisite fragrance. When once established they require but little care and spread rapidly, soon giving an abundance of flowers early in the Spring. 40cts per dozen.

GLADIOLUS.

Gladioli are among the most satisfactory Summer flowering bulbs. They are a y

to care for, strong growers, sure bloomers, and the flowers are equally fine for display in the garden or for cut flowers. The bulbs are very easy to keep overwinter, all that is needed being to keep them dry and free from frost. The bulbs should be planted as early in the Spring as possible and then every two weeks until mid-summer for a succession of bloom. Colors, shades of white, pink and red.

30cts per dozen.

TUBEROSES.

The single Armstrong's Everblooming Tuberose succeeds here and should be in every collection of Summer flowering bulbs. They are exceedingly fragrant and pure waxen white flowers are borne great clusters, opening gradually and lasting for a long time. 40cts per dozen.

CANNAS.

There is no need of our taking space to describe the Canna as it is too well known. We can supply all the leading varieties and colors. 8cts each, 80cts per dozen.

DAHLIAS.

The Dahlia is another old favorite which has come into general favor again. There are so many different types, colors and markings we shall not take room to go into details. Large double and double Cactus varieties in various shades of red, yellow and white. 25cts each for dry tubers. We will also have started plants from the named sorts in April at 10cts each.

CLEMATIS PANICULATA.

This cannot be classed as a bulb but as we omitted it in our list of herbaceous perennials we insert it here as it is entirely too good a thing to be omitted. In all the list of hardy climbers there is nothing to equal this Clematis. It is a strong rapid grower and soon covers a trellis or porch, and in the Autumn is a mass of delightfully fragrant flowers. We can supply strong field grown 3 yr. clumps at 35cts each. Smaller, mailing size, 15cts.

HONEYSUCKLES.

In overlooking our list of hardy climbers we missed this popular vine of which we have a fine stock, both in the white Haliana, and the large red, Coral or scarlet trumpet. Field grown, 25cts each.

WISTERIA.

Where a permanent vine is desired to cover a considerable expanse and make a compact shade, nothing can excel the Wisteria. It bears clusters of fragrant lavender bloom. The foliage is fine cut and bright green, and not subject to disease or insect ravages. Strong, field grown plants, 35cts each.

FLOWER SEEDS.

We buy our flower seeds in bulk of reliable growers and put them up in well filled packets ourselves, giving all seeds a thorough test before sending them out. All varieties are put up in uniform three cent packets. We could buy much cheaper seeds but they would not prove satisfactory to our patrons, so we use the same grade for our trade we use for our own planting.

ALL FLOWER SEEDS ARE PUT UP IN THREE CENT PACKETS.

Sweet Alyssum. This is one of the finest hardy annuals we have, and is beloved by all on account of its modest blossoms and sweet fragrance.

Alyssum, Little Gem. This grows much more dense and compact than the old fashioned Sweet Alyssum, and retains its sweetness. It forms a perfect carpet of white from early spring until cut down by hard freezing.

Snapdragon. (Antirrhinum.) Who has not had fun when a child making the Snapdragon blossoms open their mouths. They are hardy perennials blooming the first year from seed. 18 inches high; very showy, ranging in color from white thro' all the shades of red and yellow.

Aster. The Aster is a fine Autumn blooming plant. They grow from one to two feet, and range in color through all the shades of white, red, and blue. We can supply the Giant Branching, the Peony-flowered, the tall and dwarf sorts, in mixture.

Balsam. (Touch-me-not.) Nothing is finer than the Balsam for the border or for grouping. They enjoy hot sun, rich soil and plenty of water. For good development the plants should be from 12 to 18 inches apart. Double, in shade and markings of white pink and red.

Balsam Apple. Curious, rapid and dense climbers, with ornamental foliage and yellow fruit, which opens when ripe, showing deep scarlet seeds and lining.

Cacilia. (Flora's Paint Brush.) Pretty, free-blooming plants with tassel shaped flowers. Bright scarlet and orange yellow. Cf easy growth. 18 inches high.

Cardyuff. Hardy annuals that require very little care. Seeds germinate quickly and make a rapid growth. We have the pure white and a mixture of all colors.

Canna. This popular bedding plant with its tropic foliage has become very popular. The seeds are difficult to germinate because of their hard shell, but by filing through the shell, and soaking in warm water, they will usually start readily. We offer a fine mixture of the large flowering varieties.

Carnation, Margaret. The new Dwarf Margaret Carnations bloom in about four months from seed. A good proportion of the plants will produce fine double flowers. Shades of white, pink, and red.

Castor Bean. (Ricinus.) Stately strong growing plants, with ornamental foliage, well adapted as center plants for beds of Cannas, Dahlias, etc. Our mixture contains all the leading varieties including, the Giant Zanzibar.

Coxcomb. We need not take space to describe the Coxcomb as all know it. We offer the large combed dwarf and the feather or Ostrich Plume in a mixture of all their colors.

Centaurea. (Bachelor's Button.) Very free-flowering hardy annual. Called, also, Corn Flower, French Pink, etc. Double and single, all colors.

Cosmos. Grace, daintiness, and brilliancy are the characteristics of this pretty flower, with its yellow heart encircled by broad Daisy-like petals. Foliage is fine and feathery. 3 to 5 feet high. White pink and red, mixed.

Cypress. For training on a light ornamental trellis the Cypress vine cannot be excelled. Bears a profusion of pretty star shaped scarlet or white flowers.

Dahlia. Dahlias can be raised from seed and will bloom the first year. If sown early they will bloom profusely all fall. We offer a splendid mixture of all the leading types and colors.

Daisy. The double, often called the English, Daisy is a very popular flower where it can be successfully grown. It requires a cool, moist, partially shaded situation. Color, white, pink and red.

Larkspur. (Annual.) The annual Larkspur is a popular flower, and easily grown. All colors mixed.

Digitalis. (Foxglove.) The Foxglove is being cultivated more every year. It is a hardy perennial, easily grown and the colors are varied and beautiful. It grows easily from seed but seldom blooms the first year.

Dianthus. (Hardy Garden Pinks.) The Dianthus, including the Chinese, Japanese, Imperial, and other sorts blooming the first year, are among the best summer bedding plants. The colors are exceedingly bright and varied. Fine mixture.

Escholtzia. (California Poppy.) Low growing hardy plants with finely colored flowers. Should be planted where they are to bloom as they will not bear transplanting.

Hollyhock. For a screen or background the old fashioned Hollyhock is still a great favorite. Our mixture includes all colors saved from the finest double flowers. A hardy perennial, blooming the second year from seeds.

Hyacinth Bean. A rapid growing hardy climber, flowering freely in erect racemes, followed by ornamental seedpods. Fine for covering arbors, trellises, etc. Sow the seed where they are to remain when the ground becomes warm.

Lobelia. Charming little plants that bloom very quickly from seed and continue to bloom all through the season. Fine, for edgings, baskets or pots. Rich, dark blue is the predominating color.

Marygold. There is no need of describing the Maryolds. We can supply the large double African or the small double French varieties.

Kochia. ("Burning Bush.") A highly ornamental annual of unusually rapid growth, forming a regular pyramid two to three feet in height having a cypress like appearance. The leaves are slender and a light pea green until September, when they change to carmine and blood-red.

Marvel of Peru. This is another good old fashioned flower. Bears hundreds of flowers of white, yellow, crimson, violet and variegated.

Mignonette. A few bunches, at least of the Sweet Mignonette should be in every garden as the sprays are so fine to use in bouquets. We can supply the Matchet, the Giant White, and a mixture of many kinds.

Nigella. (Love-in-a-mist.) A compact free-flowering plant, with finely cut foliage, and curious looking flowers and seedpods. Of easy culture. Colors, blue and white.

Nicotiana. This plant attains a height of about two feet and produces an abundance of large pure white, star-shaped flowers of delicious fragrance. If taken up in the fall, cut back and potted, they will bloom all winter.

Nasturtium, Dwarf. Few plants can excel the Nasturtium for freedom of bloom or brightness of coloring. They make low compact plants. The soil should not be rich or they will run too much to foliage.

Nasturtium, Tall. The Tall Nasturtium, is of ranker growth than the Dwarf, but if grown on rather poor soil they will not spread much, and they have much larger flowers and richer colors.

Pansy. There is no flower more highly prized or more generally planted. We offer three grades of seed. Our Choice Bedding Mixture is not "cheap" seed by any means, as our growers offer us a mixture at half the cost. The flowers are of good size and form and have a wide range of colors and markings. The Giant Trimaideau is a fine large flowering mixture. Our Special Giant mixture is an extra fine mixture of all the leading giant-flowering sorts, and includes almost every color known to pansies. A packet of the last contains about one-tenth the number of seeds the first contains.

Petunia. Petunias bloom freely here under almost any conditions and are very popular. We offer only the single in a mixture of all the finest colors, stripes and blotched. We do not offer the double, or the new giant fringed single, as good seed costs from \$50 to \$500 per ounce and you couldn't find the number you would get in a three cent packet.

Phlox. Annual. The Phlox are among the showiest and easiest managed of hardy annuals. They begin blooming early and continue all summer. All colors mixed.

Poppy. We offer a splendid mixture of both the single and the double. The seed should be sown where the plants are to grow as they will not bear transplanting.

Portulacca. (Rose Moss.) A well known hardy and profuse and constant blooming, low growing annual. We can supply either the single or the double.

Salvia. [Scarlet Sage.] The Salvia is a splendid bedding plant that keeps the garden bright with color until late in the Autumn. Splendid border plant.

Scabiosa. [Mourning Bride.] Elegant for cutting, as the stems are long, color fine and they keep well. Very double and ranging in color from pure white to almost black.

Stock. These are among the finest annuals when well grown. Care should be taken that they do not receive a severe check in growth at any time.

Sweet Peas. Sweet Peas are grown by everyone. They should be planted early in trenches and the earth drawn to them as they grow. We offer a splendid mixture or can supply the colors separate.

Verbena. Well known annual and very popular. Fine mixture, all color.

Zinnia. Brilliantly colored double flowers. A little coarse but still popular.

ALL FLOWER SEEDS ARE PUT UP IN THREE CENT PACKETS.

GARDEN SEEDS.

Much depends on good garden seeds and the cost should be held secondary to the quality. We do not strive to procure the cheapest seeds, but rather the best. We put our seeds up in three cent packets at bulk rates. Two three-cent packets contain the same amount of seeds we sell for five cents, bulk. All seeds will be sent by mail, postpaid, except peas, beans and corn. The postage on these is given under their respective headings. Remember our seeds are not bought of seed JOBBERS, but of houses who have their own immense seed farms and whose seed crops are grown under their careful inspection.

ALL GARDEN SEEDS ARE PUT UP IN THREE CENT PACKETS.

BEANS.

14 lb., 7cts, 1-2 lb., 12cts, 1 lb., 20cts.
Postage, 1-2ct. per oz., 1ct per packet.

Red Valentine. (Improved Earliest.) A green podded bush bean, stringless; very tender and fine.

Black Wax. An old favorite and still as popular as ever. Quality unexcelled by any wax (yellow podded) variety.

Davis White Wax. This is considered one of the best. White seeded.

Golden Wax. There is probably more seed sold of this than any other wax. It gives good satisfaction.

Kentucky Wonder. A climbing, or pole, bean with large fleshy pods, tender and fine. Very popular.

Bush Lima. [Henderson's.] A medium sized, very prolific, dwarf Lima. Fine for cooking either green or ripe.

BEETS.

Eclipse. Considered the best blood turnip beet. Fine table sort.

Golden Tankard. (Mangel Wurzel.) An immense yielder and the favorite for growing for stock feeding.

CABBAGE.

Early Jersey Wakefield. Very early; solid pointed heads; rather small.

All Seasons. A merium early sort; forms large flat heads. Sure header.

Early Flat Dutch. Medium early, very large solid heads.

Late Flat Dutch. This is the standard cabbage. Very large and solid; good keeper and shipper.

Surehead. Large round heads; solid; a good keeper and shipper.

Red Dutch. Large red sort.

CARROT.

We have both the Chantenay, a short early variety, and the Danvers, a half-long variety, a good table sort; a good yielder.

CELERY.

Golden Self-blanching. The standard early Celery. Easily blanched. Not quite so early as White Plume but better quality.

White Plume. The earliest variety and easiest to grow and blanch and is of very good quality. Very white.

Giant Pascal. We think the best flavored celery grown. Very large, crisp and juicy.

SWEET CORN.

Price in bulk and postage same as beans.

Cory. A very early corn; a popular sort, but has not done as well with us as the Premo.

Champion. A fine large second early. Produced smooth well filled ears for us almost as early as the Cory.

Premo. A new extra early variety. Of the finest quality.

Black Mexican. Medium early; very tender and sweet. Kernels are blueish purple.

Evergreen. The standard late sort.

CUCUMBER.

Early Cluster. This is an early short chunky variety.

Improved Long Green. Vines vigorous and productive. Fine for pickling.

White Spine. A long straight smooth sort. Popular.

LETTUCE.

Black Seeded Simpson. A beautiful light green partially curled variety.

Prizehead. A closely curled reddish tinted head lettuce.

MUSK MELON.

We have the Rocky Ford, a small netted melon that is a general favorite, the Banana, a long solid yellow, of splendid quality, and the Bay View, a large, oblong, green fleshed variety.

WATER MELON.

We can supply the Black Diamond, an improved Kolb's Gem, and Kleckley's Sweet, a fine early variety.

ONION.

Red Weathersfield. This is a very popular variety. Flat, dark red and of large size. A good keeper.

Yellow Danvers. A globe shaped yellow skinned onion. Splendid keeper.

Prizebreaker. A handsome yellow globe onion of enormous size, perfect shape and finest flavor.

White Bermuda. A mammoth onion especially adapted to the south, and we think will do well here. Sweet and good keeper.

PEAS.

Prices and postage same as beans.

American Wonder. At the head of the list for flavor and quality. Very dwarf, wrinkled early sort.

First and Best. A very early and very prolific variety. Not quite so sweet as the American Wonder, but earlier and a surer and better yielder.

Everbearing. A medium height, large wrinkled sort. Productive and sweet.

Champion of England. One of the oldest of the tall wrinkled varieties, and still the best. Sweet and very productive.

PEPPER.

Ruby King. Very large ruby red mango pepper, mild and thick meated.

Cayenne. A long red "hot" pepper used for seasoning relishes and pickles.

Red Cluster. A very small hot pepper; fine for seasoning or making pepper-sauce.

PUMPKINS.

Sugar Pie. The best of all pumpkins for pies. Medium size, solid and fine grained.

Large Sweet. Very prolific and large. Flesh orange colored and sweet.

Mammoth Prize. Of enormous size and fine quality. We have grown these to weigh 85 pounds and they have been grown to twice that size.

RADISHES.

French Breakfast. An olive-shaped, very early radish. Red with white tip.

Scarlet Turnip. A small round early scarlet variety. Very popular.

Long Scarlet. Early, long scarlet sort.

White Strasburg. A large white radish,

ready to use almost as early as any and keeps good for a much longer period.

SALSIFY.

(Vegetable Oyster.) This is a really delicious vegetable and should be more generally grown. Keeps in the garden all winter and should be dug as wanted,

SQUASH.

Hubbard. The best winter squash; rich and dry. The most popular squash.

Giant Summer Crookneck. Golden yellow summer squash. Much larger than the old summer crookneck, otherwise similar.

TOMATO.

Earliana. A very early tomato, bright scarlet and of good size and form. Its one fault being that it bears good sized fruits but for a short period.

Model. (Tree.) This is a sturdy upright growing variety with heavy potato-like foliage. Bright scarlet fruits of large size smooth and even.

New Stone. The most popular main crop variety. Large, smooth, and solid.

Acme. Standard purple fruited sort. It is early, large, and very productive.

Dwarf Champion. The old standard bush tomato. Fruit of fair size, good form, and crimson in color.

Ponderosa. The largest fruited tomato grown; a little rough but solid, with few seeds.

TURNIPS.

We offer only the Purple Top Strap-leaf variety as it is the most popular, in fact about the only one called for.

Vegetable Plants.

When you want plants to set out in the spring you want to know FOR SURE, some things about them. In the first place you want to know that they are fresh. Plants that have stood in stores with their roots wet for awhile may look all right, but nine times out of ten they will have begun to decay at the root and planting them is labor in vain. In the second place you want to know what you are getting. You don't want to buy "Big Red Tomato" plants and gather fruits the size of marbles, as these little pear and cherry tomatoes are so hardy they come up volunteer often where the large tomatoes grew the year before, and it is a natural thing to take a few thousand of these to town and sell them "cheap." Our plants are grown from pure seeds in hotbeds and are early, well hardened and sturdy. Varieties the same as in seed list.

PRICES. Tomatoes, 40cts per 100; Cabbage, 25cts per 100; Pepper, 10cts per doz. Celery, 10cts per dozen from bed, 25cts per dozen from 2 inch pots.

SWEET-POTATO PLANTS. We will have, everything favorable, at least two hundred thousand sweet-potato plants, mostly Red Bermuda, Southern Queen and Notched-leaf Yellow Yam, which we sell at 20cts per hundred, \$1.75 per thousand, \$7.50 per 5000. We will have several other varieties, including the Yellow Nansemond and Pumpkin Yam at 25cts per 100.

HORSE RADISH SETS. We have a fine lot of horse-radish roots, both of the size for grinding, and the small roots for planting out. Sets, 25cts per dozen, large roots for grinding, 25cts per pound.

RHUBARB. (Pieplant.) We have strong one year roots of the mammoth sorts at 75cts per dozen.

DEMING SPRAYERS.

BARREL SPRAYS.

We can give you your choice of three, all of which are first class pumps and will meet the requirements of any farmer or fruit grower. The prices given are for the pump complete with 12 ft. of half-inch hose, couplings, Demoral nozzle, and pole-holder. If pump alone is desired deduct \$3.00 from prices.

	List price.	Our price.
Captain,	\$12.50	\$10.50
Simplex,	13.50	11.75
Granger,	16.00	13.50
Century, 13-4 in. cyl.,	16.00	13.50
" 21-4 in. cyl.	20.00	16.50

THE UNIVERSAL SUCCESS.

If you are looking for a handy "always ready" sprayer, you can find nothing better than this for the money. It is furnished with galvanized or brass tank. If to be used for copper solution or Bordeaux mixture the brass tank should be ordered.

Price, with galvanized tank, \$7.50, with brass tank, \$10.00

GARDENERS CHOICE.

This is one of the handiest outfits we handle. Is all complete, ready for use at all times. Fitted with Bordeaux nozzle and 4 feet hose. List price, \$15.00, our price, \$13.00.

SPRAY NOZZLES.

We can supply the best nozzles to be had for all kinds of work. Price for either the Bordeaux, Vermoral, or Simplex, 80 cents each; Demoral or Eureka, 70 cents; Acme or Fire protection, 35 cents. To use these fine sprayers on ordinary hose coupling

the combination coupling, described below, must be used between them.

This combination coupler will fit regular hose couplings and any of the above nozzles will fit on it. Price, 25cts each.

Where it is desired to throw a very heavy but fine mist use this coupler and two nozzles. Price, 50 cents each.

BUCKET SPRAY PUMPS.

We have several splendid bucket sprayers ranging in price from \$4.00 for a plain sprayer, with foot rest, 4 ft. hose and Acme nozzle, \$5.50 for a first class sprayer with foot rest, bucket clamp and bail holder, 4 ft. hose and Bordeaux nozzle, to a Kerosene sprayer at \$11.00, having a tank to hold kerosene, and pumping both kerosene and water at the same and in any proportion desired. Send for our large illustrated catalogue of Deming goods, which contains also a large spraying chart showing the times to spray and what to use.

Easter Lilies.

At Easter time we will have a large number of these beautiful pure white lilies in pots and cut. We, also, usually have other potted plants in bloom.

Cut Flowers.

CARNATIONS, VIOLETS, SWEET-PEAS, NARCISSUS, CALLAS,
HYACINTHS, CHYSANTHEMUMS, ETC.

Flowers are always appropriate presents and we put them up neatly in flower boxes.

Bouquets and Designs.

As people become more refined flowers are used more and more to express love and sympathy. As remembrances to sick or shut in friends, tokens of sympathy to the bereaved and of respect to the departed they are especially appropriate. Flowers are packed so they may be shipped long distances either by mail or express, but they will be more likely to reach their destination in good condition by express, as the boxes are often crushed in the mails.
